SUMMARY

Backend Engineer with experience building **distributed, scalable backend systems** in production environments. Currently working at **TCS (NSE)** on post-trade and market-open workflows, including developing the **Futures & Options Pre-Open system on FOX architecture** as part of replacing legacy SMFS flows. Creator of **QuickFill**, a Chrome extension with **600+ active users**, built end-to-end with a focus on performance and privacy. Hands-on with **Java, Kafka, Redis, microservices**, and system design.

SKILLS

Languages & Frameworks: Java, Spring Boot, ReactJS, MongoDB, SQL

Infrastructure & Tools: Kafka, Kubernetes, Docker, Git

Concepts: Microservices, Backend Engineering, System Design, Distributed Systems

EXPERIENCE

Systems Engineer, TCS | Mumbai

03/2025 - Present

- Migrated the **critical post-trade processing layer (Project Hercules)** from C to Java, improving long-term maintainability and scalability of trading systems.
- Re-architected the **legacy SMFS subsystem into FOX architecture** and developed the **Futures & Options Pre-Open system**, removing structural bottlenecks for high-frequency trading workflows.
- Developed processing flows integrating **RMS (Risk Management System)** and **COS (Central Order System)** for **Futures & Options**, enabling accurate risk checks and order handling within the application.
- Contributed to the **newly introduced CAS framework mandated by SEBI**, supporting compliant rollout across trading workflows.

SDE Intern, Shipmnts | Ahmedabad, Gujarat

01/2024 - 06/2024

- Collaborated with a team of 30+ engineers to develop scalable full-stack applications using **ReactJS, Ruby on Rails, GraphQL, Postgres, and MongoDB**, contributing to a **10% increase in development speed**.
- Co-built a **reusable frontend component library** (~30% less duplicate logic) and **optimized legacy APIs and queries**, cutting API calls ~15% and improving search latency ~5%.

Software Engineer, Freelance | Vadodara, Gujarat

06/2023 - 11/2023

- Built a **React/Electron** desktop automation tool cutting manual data entry effort by ~80%, and an order management workflow reducing handling time by ~90%.
- Implemented digital record-keeping with Excel exports and integrated Email & WhatsApp APIs for one-click billing and order sharing.

PROJECTS

QuickFill | Founder & Developer | [Web](#) | [Chrome Extension](#)

07/2024 - Present

- Launched a **Chrome extension** that automates repetitive form-filling workflows, reaching **600+ active users** since January 2025.
- Designed and implemented the **end-to-end application stack** using React, Node.js, and Firebase, with secure local data storage and reusable user profiles to protect user privacy.

Turbine (IDE) | [React.js](#), [Node.js](#), [Electron.js](#) | [GitHub](#)

- Built a custom IDE with **interactive visualizers for Trees, Graphs, and Matrices**, improving algorithm comprehension.
- Introduced a **context-aware function suggestion system** based on historical user code, and integrated Leetcode problem lookup directly inside the IDE.

URL Shortener (System Design) | [Microservices](#), [Redis](#), [Kafka](#), [Docker](#), [Kubernetes](#) | [GitHub](#)

- Designed and implemented a **scalable URL shortening service** optimized for high read/write throughput and low-latency redirection.
- Set up a **Kafka-based asynchronous analytics pipeline** (cut MongoDB write load ~70%) and **Redis caching** for hot URLs (~60% faster redirects).

EDUCATION

Btech in Information Technology, Dharmsinh Desai University | Nadiad, Gujarat | CPI: 8.5

05/2020 - 05/2024

ACHIEVEMENTS

- Achieved **3rd national-level** rank in DuHacks leading Project TURBINE (IDE); **Leetcode Guardian (Top 1.32%, 2141)** and **CodeChef 4-Star (1948)**; global rank **239** (Leetcode Biweekly 96) and **89** (CodeChef May Lunchtime).
